## About the Webinar

*We know that, combating against corruption and crime is one of the most important factors for establishing good governance. Specially, in developing countries like India, high level of corruption and crime are considered as the main obstacles for good governance, growth and community development.*

*Corruption is the root of all evils. It debases social, economic and political life. It is destroying our values of life and none of us are safe today. With the development of science and technology criminals are using scientific techniques while committing the crime. Moreover, not a day goes by where we don't hear the news of a crime against women in India.*

*Freedom from corruption and crime cannot be achieved without a vigilant, informed and sensitive citizen. Throughout history and in every country and legal system, this has been demonstrated time after time. So, we think there is an urgent need to organize seminars/webinars for much more discussion on the topics corruption, crime and good governance to give awareness and change to all the younger generation or in other words there is a need for Anti-Corruption and Anti-Crime education exclusively for the young generation.*
