About SAIARD

South Asian Institute for Advanced Research and Development (SAIARD), <https://saiard.co.in/>, an autonomous Policy Advocacy Think Tank and the Regional Capacity Building Centre (Eastern India) of NMCG, Ministry of Jal Shakti, Govt of India, has been formed in Kolkata (under the Trustee Registration Act of Govt of India) with a motto to promote research, advocacy, education and innovative ideas through publication, various outreach programs, collaborations and partnerships for sustainable and cognitive development of this region. <https://saiard.co.in/recognitions/> We are mostly working on the 5 aspects. These are, Academia, Research, Capacity Building/Training, Policy Framing and Livelihood development. For that purpose since its formation SAIARD has taken a community based approach through its various training, education awareness and entrepreneurship programs in reaching the modern face of technological innovations in collaboration with the different government & non-Govt. organisations like NATMO, IMD, NIUA, NMCG, NBSS&LUP, ICHR; International organisations like SAARC-Sri Lanka, GOC-Australia etc. and universities too and most of them are now associated with us through MOU. <https://saiard.co.in/associated-institutions/>.

Aims and objectives of the Seminar

Wetlands are often referred to as the kidneys of the environment due to their crucial role in regulating water and filtering pollutants from the landscape. Wetlands generally refer to areas that are intermediate between terrestrial ecosystems and aquatic ecosystems. Wetlands not only regulate the water cycle, but also regulate the carbon and nitrogen cycles and control floods by holding rainwater, as well as providing food and energy. At present, urbanization, expansion of agriculture, establishment of industries, indiscriminate fishing, killing of birds, chemical fertilizers used in agriculture, various waste materials, polluted water from mills mix in the wetland and disrupt the ecosystem of the wetland, resulting in the degradation of the environment. It upset the balance, which has made future generations and the environment unstable. The main objective of organizing the seminar is overall conservation and restoration of wetlands to improve the biodiversity and ecosystem of the wetlands, to enhance the desired water quality. It is hoped that through the discussions. We can send a message regarding the importance of wetland and its conservation to the local people. As our participants are students, teachers and local people so, they can accelerate the campaigning in a wide range.
