About

In post Covid world, we are forced to embrace digital transformation very fast in almost all aspects in our life and artificial intelligence (IA) is going to play a very important role in it. In this webinar we would like to impart knowledge and necessary information about how the new technologies are going to change the arena of educational and technological fields. Furthermore, we will be emphasizing on survival strategies in this new challenging world and would come up with new horizons for our students to build up their career in various fields and acquire different skills to find viable opportunities in the professional world across the globe.
